GENERAL INFORMATION

13. SERVICE CLASSIFICATION RIDERS (Continued)

RIDER G (Continued)

NYPA – EDP DELIVERY SERVICE RIDER

RATE (Continued)

Customers taking service hereunder will take and pay for service in accordance with the rates and charges contained in the service classification under which the customer would otherwise take service excluding the Market Supply Charge for electric power supply provided by the NYPA or an ESCO.

For that portion of the customer's electric power supply requirement provided by the Company, if any, the customer will be billed in accordance with the provisions of the applicable service classification including the Market Supply Charge, unless the customer elects Rider M.

For customers electing Rider M for that portion of the load, if any, served by the Company, the kWh to be billed under Rider M shall be determined hourly by multiplying the customer's hourly kWh use by the ratio of the demand supplied by the Company in the billing month to the customer's total demand for the billing month. The Capacity Obligation in kW to be billed under Rider M shall be equal to the customer's Capacity Obligation, determined in accordance with General Information Section No. 15 of this Rate Schedule, minus the demand supplied by the NYPA.

BILLING

For billing purposes, the demand and energy supplied by the NYPA and delivered by the Company shall be determined as follows:

The demand shall be equal to the lesser of: (a) the customer's registered monthly maximum demand, or (b) the demand the NYPA has contracted to supply to the customer to be delivered by the Company.

The energy, in kWh, shall be equal to the product of the demand supplied by the NYPA times the hours' use of that demand during the billing period. The hours' use of the NYPA-supplied demand shall be equal to the hours' use of all demand supplied, which shall be determined by dividing the customer's total kWh used in the billing period by the maximum demand recorded for that billing period.
